III. GAME MECHANICS

There are a total of 10 worlds and you are allowed 3 lives per player per game. In the first 7 worlds you must find and collect the 8 Symbols of Harmony. When the symbol counter reaches 8, you will be able and empowered to deal with the boss in that world. You must defeat the boss and find the key which will open the door to the next world. World 8 and 9 permit you to challenge the known deity. World 10 is where you will encounter the Unknown Twin Divine Deity.

Master Chi and his partner (an optional second player), the Drunken Ho, each starts with 12 units of life force. Every time the Master is hit or comes in contact with an enemy, the life force is reduced by 2 units. If the life force is fully depleted and the Master is hit again, you loose a life.

IV. DOUBLE PLAYERS

This game features simultaneous play for two players. If you are playing a double player game and one player loses all three lives, he must wait for the other player to finish. Upon the end of a double player game, both players will be given the option to continue. When the players are far far apart from each other, the screen will stop scrolling until one player moves away from the edge of the screen. This way both players will always remain on the screen.
